

Team Meetings

Date: Feb 2

Attendees:

Daven
Ali
David
Mohamad

Absent:

1. Project

Progress

- Daven: Worked on term 2 presentation to TA.
- Ali: Fixing back end calls to return appointment information
- David : meeting with teammate to advance admin page, looking into google api
- Mohamad: Met with the team and created our project plan presentation slides. Working on completing the presentation alongside the team to present by the date given.

Blockers + Surprises

- Daven: My local git has issues and I am unable to push/pull from remote Not letting me make updates to the weekly git. Getting back into all my classes starting at once while being sick and trying to figure out where I left off in the project has caused a rocky start. Unfamiliar with tech stack and the style of code used by previous team (which provided the base).
- Ali: Previous team's appointment booking system is broken
- David: Stack is new to me, little experience with google api
- Mohamad: Time Zone difference brought up problems with the team meeting. Country restrictions on discord availability had to be overcome by using website/vpn.

2. Learning Activity

Daven: Learn about using maps api with external database

Ali: Learning about firebase

David: outside material(react.js , node.js)

Mohamad: N/A.

3. Plan

Task for this week:

Daven: Try to fix local git so I can pull the latest and make updates to the remote git. Try to find a tutorial on using maps api.

Ali: Get back end to send proper information about appointment schedule. Have a meeting with a client, have a separate meeting afterwards to talk about our plan.

David : work on admin page and start looking into api implementation

Mohamad: Finish up the presentation slides. Present alongside the team on Friday to our TA. Proceed with relevant code work afterwards.

Learning activities proposed for this week:

1. Daven: learning about maps api
2. Mohamad: N/A.

Goals for the next milestone:

1. Daven: Have a map load on the site page with location markers.
2. Ali: Have core functions running: Payment and scheduling
3. David : Admin page
4. Mohamad: Admin page, potentially add a paypal payment option.
