

Team Meetings

Date: Jan 11

Attendees:

Daven

Ali

David

Mohamad

Absent:

1. Project

Progress

- Daven: Zero progress made this week as it's the first week back since winter holidays. Still aiming to figure out which map api to use and how to integrate into the site.
- Ali: No progress made this week, first meeting on friday.
- David : outside learning material
- Mohamad: Not much progress yet as the first week of term just commenced. Some minor revisions of code structure.

Blockers + Surprises

- Daven: For me, getting back into all my classes starting at once while also trying to figure out where I left off in the project has caused a rocky start.
- Ali: My old code is confusing, I need to look at making it more readable.
- David: Stack is new to me and code base is a little confusing.
- Mohamad: Biggest obstacle is the previous team's code is still hard to figure out, certain parts are not documented very well making it hard to see which parts correspond to what aspects of the site.

2. Learning Activity

Daven: nothing

Ali: nothing

David: outside material

Mohamad: N/A.

3. Plan

Task for this week:

- Daven: nothing
- Have a meeting with a client, have a separate meeting afterwards to talk about our plan.

David : meet with client and with group to get back on track.

Mohamad: Revise code again, meet with team and talk about our next tasks. (Focusing on fixing the admin page backend as some unidentified errors popped up; possibly rewrite the code).

Learning activities proposed for this week:

1. Daven: submit progress report to client, confirm with client team is on the right track, and narrow down maps api.
2. Mohamad: more practice with React components.

Goals for the next milestone:

1. Daven: Have a map load on the site page with location markers.
2. Ali: Data validation and security bug fixing
3. David : Admin page
4. Mohamad: Admin page, potentially add a paypal payment option.
