

Team Meetings

Date: Jan 18

Attendees:

Daven
Ali
David
Mohamad

Absent:

1. Project

Progress

- Mohamad: Starting up on the project plan presentation.
 - David : Working on the progress report and on the organization of tasks for the next milestone. The meeting with the client was yesterday so we had to wait to be able to address certain questions.
 - Daven: worked on progress report for client. Trying to organize next steps personally to progress towards next milestone.

Blockers + Surprises

- Mohamad: Meetings are harder to schedule/attend because of timezone differences.
 - Last week's Meeting with client was postponed to this week due to schedule conflicts
 - Daven: getting over being extremely sick with all of my classes so I am having a bit of trouble keeping up with everything but I'm working on it.

2. Learning Activity

Mohamad: N/A.

3. Plan

Task for this week:

- Mohamad: Keep working on my part of the presentation, and work on fixing current issues with code. Possibly work around errors by starting on the front-end.
 - Daven: work on presentation. Catch-up/reorganize myself. Finalize and start on next steps (either maps or design).

Learning activities proposed for this week:

1. Mohamad: Refresh memory on proper routing to ensure errors aren't due to that.
2. David : Learning Node.js and looking into testing strategies
3. Daven: still learning technologies used in tech stack as well as how to use the

api.

Goals for the next milestone:

1. Mohamad: Admin page, potentially add a paypal payment option. Additional design work possibly.
2. David : Helping with the Admin page, Looking into testing methodologies that we can apply to our current work.
3. Daven: closer to having the map show up on the page. Possibly design work on admin page.
